Citizens' initiative 'Sign against nuclear weapons'

No. 10

MOTION PROPOSED BY THE MEMBERS SJOERDSMA AND SERVAES

Proposed on 28 April 2016

The House, having heard the deliberations, considering that achieving 'global zero' for nuclear weapons is one of the objectives of Dutch foreign policy; considering that a debate is currently being conducted on the modernisation of the tactical nuclear weapons that are present in Europe; considering that the motion proposed by Omzigt *et al.* (33 400 V, no. 65) directly links this undesirable modernisation to the removal of the tactical nuclear weapons that are present in Europe as a fixed objective of government policy; considering that the debate on nuclear disarmament is currently in an impasse; considering that the removal of nuclear weapons from the Netherlands and from Europe may be used to encourage Russia to make a similar gesture; urges the government to seize the opportunity presented by this undesirable modernisation of the nuclear weapons in Europe to reinvigorate efforts to achieve worldwide nuclear disarmament, and proceeds to the order of the day.
